PROFESSIONAL SUMMARY

Full Stack Developer (MERN Stack) with hands-on industry experience in full stack web application development, building and shipping production features for TapCRM, a live SaaS CRM platform, using React.js, Node.js, Express.js and PostgreSQL. Skilled in RESTful API design and development, JWT token-based authentication and authorization, role-based access control (RBAC), Redux Toolkit state management, real-time communication with Socket.IO, third-party and AI API integration, and responsive, component-based UI development. Experienced in monorepo codebases, Agile/SDLC delivery, Git version control and API testing, with working knowledge of Docker, Redis and system design fundamentals. B.Tech in Electronics & Communication Engineering (2026). Seeking a Full Stack Developer / Software Developer role. Immediate joiner.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frontend: React.js (ReactJS), Redux Toolkit, State Management, Single Page Applications (SPA), Component-Based Architecture, Responsive Web Design, Reusable UI Components, Vite

Backend: Node.js (NodeJS), Express.js (ExpressJS), RESTful API Development, REST API Integration, Server-Side Development, Middleware, Socket.IO, WebSockets, Real-Time Communication, Microservice-Ready API Design

Security & Auth: JWT Authentication, Access and Refresh Tokens, Authentication and Authorization, Role-Based Access Control (RBAC), Password Hashing (Bcrypt), Protected Routes

Databases: PostgreSQL (Learning), MongoDB, SQL, NoSQL, Redis, Database Design, Data Modeling, Schema Design, CRUD Operations

Tools & DevOps: Git, GitHub, Version Control, Docker, Postman, VS Code, Monorepo, Cloudinary, Multer (File Uploads), Nodemailer (Email Integration)

AI Tools: Claude, Codex, Antigravity

Design Tools: Figma, Photoshop, Canva, Google Stitch, Procreate, Wireframing, Prototyping, UI/UX Design

Practices: SDLC, Agile Methodology, API Testing, Debugging, Root-Cause Analysis, Code Reviews, System Design (Basics), Architecture Design, Technical Documentation, SEO (Learning), Problem Solving, Cross-Functional Collaboration, Stakeholder Communication

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern (Full-time) | Tapvera Technologies | Sep 2026 – Present

TapCRM – SaaS-Based CRM Platform (Live Production Project) | React.js, Node.js, Express.js, PostgreSQL

- Developed and deployed the Employment module and 360° Employee View, consolidating employee data into a single-screen interface using React.js, Node.js and PostgreSQL.
- Designed and implemented Task, Todo and Notepad modules with RESTful APIs and database integration to support task management and productivity workflows.
- Built responsive, reusable React.js components, improving UI consistency and development speed across the application.
- Tested, debugged and optimized API endpoints using Postman; resolved issues through root-cause analysis.
- Worked in a monorepo codebase with shared modules across frontend and backend packages; collaborated in an Agile team using Git/GitHub for version control, branching and pull requests.

PROJECTS

Nuvora – AI-Powered E-Commerce Platform | 2026
React.js, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Cloudinary, Google Gemini AI API

- Architected and developed a full stack e-commerce application with separate Buyer and Seller workflows and JWT-based role-based access control (RBAC).
- Implemented product management, cart, wishlist, order management and review modules with RESTful APIs and MongoDB.
- Integrated Google Gemini AI API to generate automated product review summaries, improving product evaluation for buyers.

Jobly – Full Stack Job Portal | 2026
React.js, Vite, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, Bcrypt, Multer, Nodemailer

- Built candidate and recruiter dashboards with role-based access control and secure JWT and Bcrypt authentication.
- Implemented multi-field job search, one-click job applications, real-time application status tracking, resume uploads (Multer) and automated email notifications (Nodemailer).

NoteVault – Secure RESTful Backend API | 2026
Node.js, Express.js, MongoDB, JWT, Bcrypt, Multer, Nodemailer, Postman

- Developed a secure REST API with JWT access and refresh token authentication, password hashing, protected routes and complete CRUD operations.
- Integrated file uploads and email notifications; validated all endpoints with Postman API testing.

Zuno – Real-Time Chat Application (MERN + Socket.IO) | 2026
React.js, Node.js, Express.js, MongoDB, Socket.IO

- Developed a full stack real-time chat application using the MERN stack, with instant bi-directional messaging over Socket.IO (WebSockets).
- Built RESTful APIs with Express.js and MongoDB for data persistence, and a responsive React.js interface for live conversations.

UI/UX Design Portfolio | Figma | behance.net/siddharbanerje10

- Created wireframes, prototypes and responsive, user-centered web designs.

TRAINING

MERN Stack + TypeScript Training Program | Weavers Web Academy | 2026

- Completed a 7-month, project-based full stack development program covering requirement analysis, design, development, testing and deployment (SDLC); delivered multiple end-to-end applications individually and in teams.

EDUCATION

B.Tech – Electronics & Communication Engineering | Techno India University | CGPA: 7.2/10 | 2023 – 2026

Diploma – Electrical Engineering | Technique Polytechnique Institute | CGPA: 8.5/10 | 2020 – 2023

Class XII (CBSE) | Kalyani Central Model School | 2020

Class X (CBSE) | Kendriya Vidyalaya Kankinara | CGPA: 7.4/10 | 2017
